

PORT-A-FIELD™

PORTABLE ATHLETIC FIELD LINES ENGINEERED FOR YOUR SPORT

Portable Field Lining Systems

- Create lined fields in minutes
- Custom sized and marked for every sport
- Saves time & money

Setup as easy as 1 - 2 - 3

Made from **SuperStrength HTP™** (High Tenacity Polymers), Port-a-Field is a strong, durable, weatherproof field lining solution that is still lightweight and compact. HTP gives the material the elasticity needed to stretch slightly under a strain, enabling users to pull tight, making laser straight lines while minimizing and virtually eliminating tripping issues. This **“Give & Go”** design allows the material to move and go with the play upon contact, going back into place when released. SuperStrength HTP™ is woven for added strength and can last for years. We make fields for over 31 sports and 250+ sizes and varieties. Universal multi-purpose fields are also available. Users say it's not the next best thing to paint, it's **better than paint!**
